Profile

Software Engineering undergraduate student at Institut Teknologi Sepuluh Nopember (ITS) with a strong foundation in programming, software design, and system development. Skilled in problem-solving, teamwork, and strategic thinking. Actively involved in academic assistance and student organizations with demonstrated leadership and communication skills.

Education

Institut Teknologi Sepuluh Nopember (ITS) – Surabaya, Indonesia
Bachelor of Software Engineering

- GPA: 3.64/4.00
- Active in department committees and academic organizations

Work Experience

AI Engineer Intern – AI Talent Factory (AITF) Komdigi RI, February 2026 - June 2026 Hybrid, Indonesia

- Leveraged advanced LLM training methodologies, including Continual Pre-Training (CPT) and Supervised Fine-Tuning (SFT), to enhance model performance, achieving high contextual accuracy.
- Collaborated on real-world AI challenges, contributing to the advancement of Indonesia's AI capabilities and supporting the Indonesia Emas 2045 vision.

Quality Assurance Engineer Freelance – Raih Asa, March 2026 - Present Remote, Indonesia

- Designed and executed test cases (both manual and automated) to identify bugs, regressions, and system inconsistencies prior to production releases.
- Partnered with the development team to track the bug lifecycle using project management tools to ensure overall product quality, security, and stability.

Algorithms and Programming Lab Assistant, May 2025 – Present, ITS – Surabaya, Indonesia

- Facilitated practical sessions to help students understand algorithms and programming concepts.
- Supported curriculum development and monitored student performance to maintain academic quality.

Community Service – Algorithms and Programming Lab Assistant, ITS – Surabaya, Indonesia

- Took part in a community service initiative (AI Training for Elementary School Teachers) by the FTEIC ITS Algorithms and Programming Laboratory, delivering AI/LLM literacy training to teachers at SD Islam Darul Arqom 1 and 2, Surabaya.
- Focused the training on practical use of generative AI through prompt engineering for educational contexts.

Programming Division Coordinator – ITS GEMASTIK 2026 Delegation (Ditmawa ITS), February 2026 - Present ITS Surabaya, Indonesia

- Led and coordinated the division team in designing competition frameworks, creating problem sets, and provisioning a fair and valid competition platform/environment.
- Managed technical risks and resource allocation to ensure the seamless execution of the national-level programming competition from the preliminary to final rounds.

Teaching Assistant – Software Design, February 2026 - June 2026 ITS Surabaya, Indonesia

- Guided and mentored students in applying Agile/Scrum methodologies and software development best practices within real-world team projects.
- Conducted regular code reviews and evaluated architecture and functionality to ensure code quality standards and clean code practices.

Teaching Assistant – Data Structure, February 2026 - June 2026 ITS Surabaya, Indonesia

- Taught foundational to advanced data structure concepts (including trees, graphs, and hashing) and assisted students in implementing efficient algorithms.
- Formulated, tested, and graded lab assignments while providing constructive feedback to sharpen students' problem-solving and programming logic skills.

Teaching Assistant – Fundamental Programming, July 2025 - November 2025, ITS - Surabaya, Indonesia

- Assisted students in understanding programming fundamentals using C/C++.
- Provided guidance during lab sessions and supported assignment debugging.

Teaching Assistant – Software Design, February 2025 - July 2025, ITS - Surabaya Indonesia

- Guided students to UML diagrams, design patterns, and fundamentals of software architecture.
- Provided feedback on design assignments and facilitated group discussions.

Teaching Assistant – Mobile Programming, February 2025 - July 2025 ITS Surabaya, Indonesia

- Assisted students in developing Android applications using Java and Android Studio.
- Conducted practical sessions and supported debugging during projects.

Committee Experience

Head of Department, Research and Technology HMTC ITS, January 2026 - Present, ITS – Surabaya, Indonesia

- Directed the strategic vision of the department in designing and executing innovative, organization-wide work programs focused on research and technological development.
- Oversaw staff performance, managed budgets, and established strategic external partnerships to expand the impact of the department's technological initiatives.

Deputy Head of Research and Technology Bureau HMTC ITS, February 2025 - January 2026, ITS – Surabaya, Indonesia

- Organized workshops and seminars to support student academic development.
- Coordinated programs related to research and innovation in software engineering.

Mentor of ITS CAMP 2025 Ditmawa ITS, June 2025 - August 2025, ITS – Surabaya, Indonesia

- Monitorized 20 participants to post event activities.
- Delivered Structured learning materials and assignment throughout the program.

Internship Staff Student, Welfare, Research and Technology Department HMTC ITS, October 2024 - February 2025, ITS – Surabaya, Indonesia

- Contributed to internal research and the development of technology-based initiatives to support student welfare and skill enhancement.
- Assisted with logistical and technical coordination for department events while maintaining efficient communication workflows within the team.

Staff of Mentor Division Iclenation 2024 BEM FTEIC ITS, June 2024 - August 2024, ITS – Surabaya, Indonesia

- Serve as Mentor for 10 new student, fostering enggagement, adaptation, and supportive learning environment throughtout the program.
- Collaborated with a team of 10 Mentors to ensure effective development orientation and integration of new student into the community.

Mentor of OKKBK HMTC 2025 HMTC ITS, June 2025 - August 2025, ITS – Surabaya, Indonesia

- Helped freshmen adapt to informatics engineering environment.
- Mentored 11 new Informatics Engineering students during orientation.

Staff – Korps Sukarela (KSR) PMI ITS, March 2023 – Present, ITS – Surabaya, Indonesia

- Provided first aid services and assisted in emergency response operations during campus events.

Staff – Google Developer Student Club (GDSC), August 2023 – Juny 2025, ITS – Surabaya, Indonesia

- Contributed to software development projects and participated in technical workshops.

Staff of Logic – Schematics ITS, February 2023 - December 2024 , ITS – Surabaya, Indonesia

- Designed questions and developed an assessment system for the National Logic Competition (NLC).

Projects

Training Assistant – AI Systems (BPJS Program)

- Contributed to designing and developing training materials for a 3-day technical program for BPJS, covering code quality, microservices architecture, and big data systems with AI-driven security.
- Structured end-to-end learning flows and simplified complex engineering concepts into practical, hands-on sessions for AI-integrated application prototyping.
- Facilitated training on intelligent bug scanning, vulnerability detection using OWASP Top 10 standards, and large-scale unit testing automation using Antigravity technology.
- **Tools:** AI Systems, Microservices Architecture, OWASP Top 10, Unit Testing Automation, Antigravity, Bug Scanning

Documentation and AI Training – SENOPATI ITS (Sepuluh Nopember Personal Assistant with Intelligence) https://senopati.its.ac.id

- Responsible for project documentation and AI training for SENOPATI, an intelligent assistant platform by ITS.
- Supported model training, data preparation, and system documentation to enhance accuracy and maintainability.
- Collaborated with the Laravel development team for deployment and platform improvements.
- **Tools:** Laravel, PHP, MySQL, Documentation Management, AI Model Training

Developer – JUTI OJS ITS Project

- Developed and customized **plugins and themes** for JUTI's Open Journal System (OJS) platform to enhance the journal's publishing workflow.
- Collaborated with UI/UX Designers to implement immersion and feature improvements for better usability and performance.
- Focused on system optimization, backend configuration, and PKP OJS integration.
- **Tools:** PHP, PKP OJS, MySQL, System Optimization

Skills

Languages: C, Java, PHP, MySQL, Python, Laravel

Tools: Android Studio, OJS, UML, Git, Laravel

Soft Skills: Critical Thinking, Decision Making, Team Organization, Communication, Time Management
